TEACHING TYPING SKILLS SINCE 1995

Quick Update

What's been going on at KAZ?

In April 2015, KAZ came under new ownership and after evaluation and consultation with their educational and corporate establishments, it was decided that a major makeover was to be undertaken. The whole KAZ program, website and back-office would be re-written into HTML5, featuring new imagery, graphics and animations - making it one of the most up to date typing tutor software courses on the market!

Still using their proven 'ACCELERATED LEARNING' method of teaching, KAZ bird has been brought to life and guides you through the course in a structured but light hearted manner. **Due for launch December 2016.**
