

KAZ Screenshot Demo - Online Version

KAZ is a professional Typing tutor designed to teach you to type in the quickest possible time and is special needs enabled.

Once logged in, you will be offered a choice between a UK or US keyboard, accompanied with appropriate accents.

You will then be asked to select between a choice of the available versions of KAZ.

We suggest 'KAZ with sound' but 'KAZ text version' is also available for use where silence is necessary, such as in offices, libraries etc. There is also an 'audio description version' (for the visually impaired).

You will then be presented with the main menu, comprising of 5 modules. We suggest you work through this screen progressively, in order to gain maximum benefit from the course.

Flying Start - is a short introductory module giving a brief overview on how to use the course, introduces KAZ bird (our navigation tool) and covers the important topic of correct posture.

The Basics - is the most important section of the course and using KAZ's scientifically developed phrases and method, teaches the A-Z keys in an average of just 90 minutes.

Start with the first, then progress through the rest of the phrases in order until this section is complete. Do not miss out any phrases. Remember, though some may sound a little bizarre, they have been scientifically structured and specifically designed to teach the fingers of both hands to work symmetrically and simultaneously.

This is the standard KAZ interface you will see throughout the entire course. At the bottom is the keyboard (or key guide) which demonstrates the correct fingers to use for each letter and above it sit two screens. The right demo screen displays the text you need to type and the left screen displays what you type in.

Remember, you can switch from 'Audio' to 'Text only' by simply clicking the 'sound on/off' button.

Just do it - reinforces what you have just learned and builds upon that foundation, introducing you to new words, whilst improving and honing your newly found skill.

And the rest - is where you complete the keyboard, learning the punctuation keys.

Finally, **SpeedBuilder** - is designed for frequent use throughout the day. It helps improve your typing speed, your accuracy and develops your typing rhythm.

You will be given the option of practising either short phrases or paragraphs

and the choice of using just the A-Z keys or the whole keyboard including punctuation. Once you pull the lever, 20 phrases will consecutively appear on

the top screen and what you type will appear on the bottom. The scale at the top will display your accuracy and words per minute. Should you wish to reset the counter at any time, you just need to pull the 'reset' lever.

It's as simple as that.

KAZ is available for Mac or PC - Online, via our cloud based server, as a Download or on CD.
