

'Junior Edition' instils confidence and teaches Amy and Lucile how to touch type correctly!

Lillian Herridge, mother, was asked by 'Bizziebaby' to review KAZ Typing Tutor's junior edition. Lillian thought getting her two girls, Amy and Lucile, aged 8 and 10 to try out KAZ, would be the perfect opportunity to teach them to touch type correctly!

In today's world, do you think children are familiar with a computer from an early age?

"Yes, they are computer savvy from an early age. My 2 daughters are always on the computer, writing and preparing tasks for school but using just two fingers!"

What did you think of the course?

"The set up and process of organising everything online was easy for my daughters. The programme offers a 'getting started' section, then they would just go through each stage. The instructions were very clear and easy to follow. It took them both through each step and explained everything clearly. The whole programme outlined how to begin and how to position your fingers on the keyboard. It started them off with simple exercises and they could take their time at each stage. A really good programme which allows each child to learn at the pace that suits them, which is so important. You could also opt for sound, which made it easier for the girls to follow. You can also obtain a review of your progress. My daughters did not encounter any problems using this online programme."

Has it made a difference to their typing?

"I have seen a real difference in their typing skills, which will make it easier and quicker for both my daughters to prepare various essays etc. for themselves or school work. It has also increased their confidence on the keyboard and they no longer use just 2 fingers. Now they have this to work with, I know their typing skills will continue to improve. Results are great!"

What do you think of the price?

"It is certainly really good value - excellent value for money and I am surprised this is not in more schools. A great product which is child friendly and easy to follow."

What do you think of the KAZ website?

"Easy to use and navigate."

What do you think of KAZ and would you recommend it?

"A great product and I would highly recommend it. For anyone who wants to help children learn how to type with confidence, this is a good investment. My girls loved it!"
