The KAZ Online Website and Software are hosted on the Cloud

You will then be asked to select between a choice of the available versions of KAZ.

The screenshot shows the 'Select Your KAZ Version' page. At the top, there are three options: 'KAZ with Sound' (selected), 'KAZ Text Version', and 'Audio Description'. Each option has a small icon and a brief description. Below the options are links for 'Terms of Use', 'License Agreement', and 'Privacy', along with a note about the website being hosted in the Cloud.

We suggest 'KAZ with sound' but 'KAZ text version' is also available for use where silence is necessary, such as in offices, libraries etc. There is also an 'audio description version' (for the visually impaired).

The screenshot shows the main menu with the 'Flying Start' module selected. Other modules visible include 'The Basics', 'Just Do It', 'And The Rest', and 'SpeedBuilder'. A 'Learn to touch type in 90 mins!' button is highlighted. On the right, there's a cartoon bird character, a 'SOUND OFF' button, and an 'EXIT' button. The bottom of the screen includes standard links for 'Terms of Use', 'License Agreement', and 'Privacy'.

You will then be presented with the main menu, comprising of 5 modules. We suggest you work through this screen progressively, in order to gain maximum benefit from the course.

The screenshot shows the 'Flying Start' module. It contains three sections: 'How KAZ Works', 'Using KAZ', and 'Bare Essentials'. A cartoon bird character is on the right, and a 'SOUND OFF' button is at the bottom right. The bottom of the screen includes standard links for 'Terms of Use', 'License Agreement', and 'Privacy'.

**Flying Start** - is a short introductory module giving a brief overview on how to use the course, introduces KAZ bird (our navigation tool) and covers the important topic of correct posture.

**The Basics** - is the most important section of the course and using KAZ's scientifically developed phrases and method, teaches the A-Z keys in an average of just 90 minutes.

Start with the first, then progress through the rest of the phrases in order until this section is complete. Do not miss out any phrases. Remember, though some may sound a little bizarre, they have been scientifically structured and specifically designed to teach the fingers of both hands to work symmetrically and simultaneously.

This is the standard KAZ interface you will see throughout the entire course. At the bottom is the keyboard (or key guide) which demonstrates the correct fingers to use for each letter and above it sit two screens. The right demo

screen displays the text you need to type and the left screen displays what you type in.

Remember, you can switch from 'Audio' to 'Text only' by simply clicking the 'sound on/off' button.

**Just do it** - reinforces what you have just learned and builds upon that foundation, introducing you to new words, whilst improving and honing your newly found skill.

**And the rest** - is where you complete the keyboard, learning the punctuation keys.

Finally, **SpeedBuilder** - is designed for frequent use throughout the day. It helps improve your typing speed, your accuracy and develops your typing rhythm.

You will be given the option of practising either short phrases or paragraphs

and the choice of using just the A-Z keys or the whole keyboard including punctuation. Once you pull the lever, 20 phrases will consecutively appear on the top screen and what you type will appear on the bottom. The scale at the top will display your accuracy and words per minute. Should you wish to reset the counter at any time, you just need to pull the 'reset' lever.

It's as simple as that.

KAZ is available for Mac or PC - Online, via our cloud based server, as a Download or on CD.
