

KAZ and Safari Version 11

The new Safari Version 11 automatically stops media with audio from automatically playing on most websites.

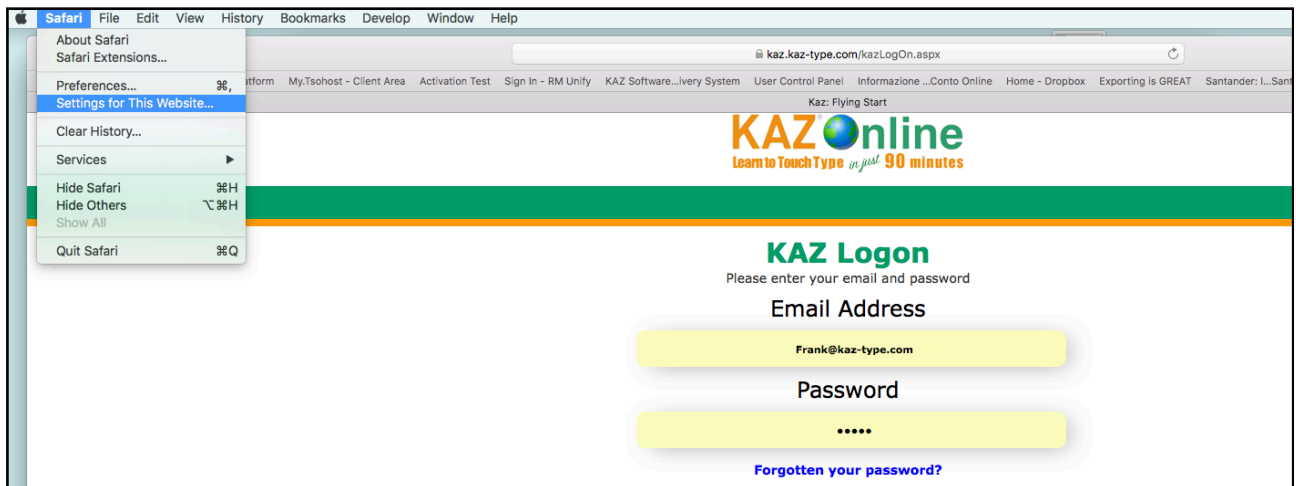

Safari
Version 11.0
Installed Sep 20, 2017

The Safari 11 update is recommended for all macOS Sierra users and contains improvements to privacy, compatibility, and security. This update:

- Stops media with audio from automatically playing on most websites
- Adds the ability to configure Reader, content blockers, page zoom, and auto-play settings on a per-website basis, or for all websites... [More](#)

To enable audio on your Safari browser for the KAZ Course please navigate to our login page and use the following guidelines:

1. Select: Safari / Setting for this website

2. Select: Allow All Auto-Play - This will enable the audio.
