

# KAZ DSA Bulletin

KEYBOARD A-Z TEACHING TYPING SKILLS SINCE 1995

Amongst the emails we've received, some assessors informed us that they were using the free typing test on the home page of our website to assess students' typing abilities. They advised it was a quick and easy way of establishing whether or not students needed to learn to touch type.

Do you need KAZ?  
Take our **FREE** typing test

We found this very interesting, so thought we would share it with everyone, should you wish to do the same.

The free typing test lasts for just 90 seconds and gives a good indication of students' typing ability. As a guide, 35wpm - typing with all fingers and thumbs is good - they will not require KAZ. Anything below or if they are typing fast but with just two or a few fingers indicates the need to learn.

Please remember that touch typing is not about what your fingers are doing but about what is going on in your brain.

*'Subconscious touch typing frees the conscious mind to concentrate on more important tasks such as, planning, composing, processing, proof-reading and editing. It reduces mental load, improves quality of work, increases productivity and students' overall performance in assignments and exams.'*

Our DSA bundle edition is also City & Guilds assured. This edition generates a 'City & Guilds' certificate and digital badge, which on successful completion, validates the learning. Students can then showcase their digital badge & certificate on CVs, job applications and on social media.

*(Please note the digital badge may take upto 28 days for delivery, as it is dependant on the City & Guilds processing department.)*

Should you wish to arrange a webinar for your centre or join in one, please contact: [sheraleen@kaz-type.com](mailto:sheraleen@kaz-type.com)

Lastly... Please see all our resources and interact with us on the DSA/Student Portal.
